

SUBLIME

RE-INVENT THE WALL SWITCH

Encountering SUBLIME
Is like discovering art shaped in space:
The weight of intention in sculpture,
The stillness of feeling in painting,
The balance of motion in architecture,
The echo of harmony in symphony.

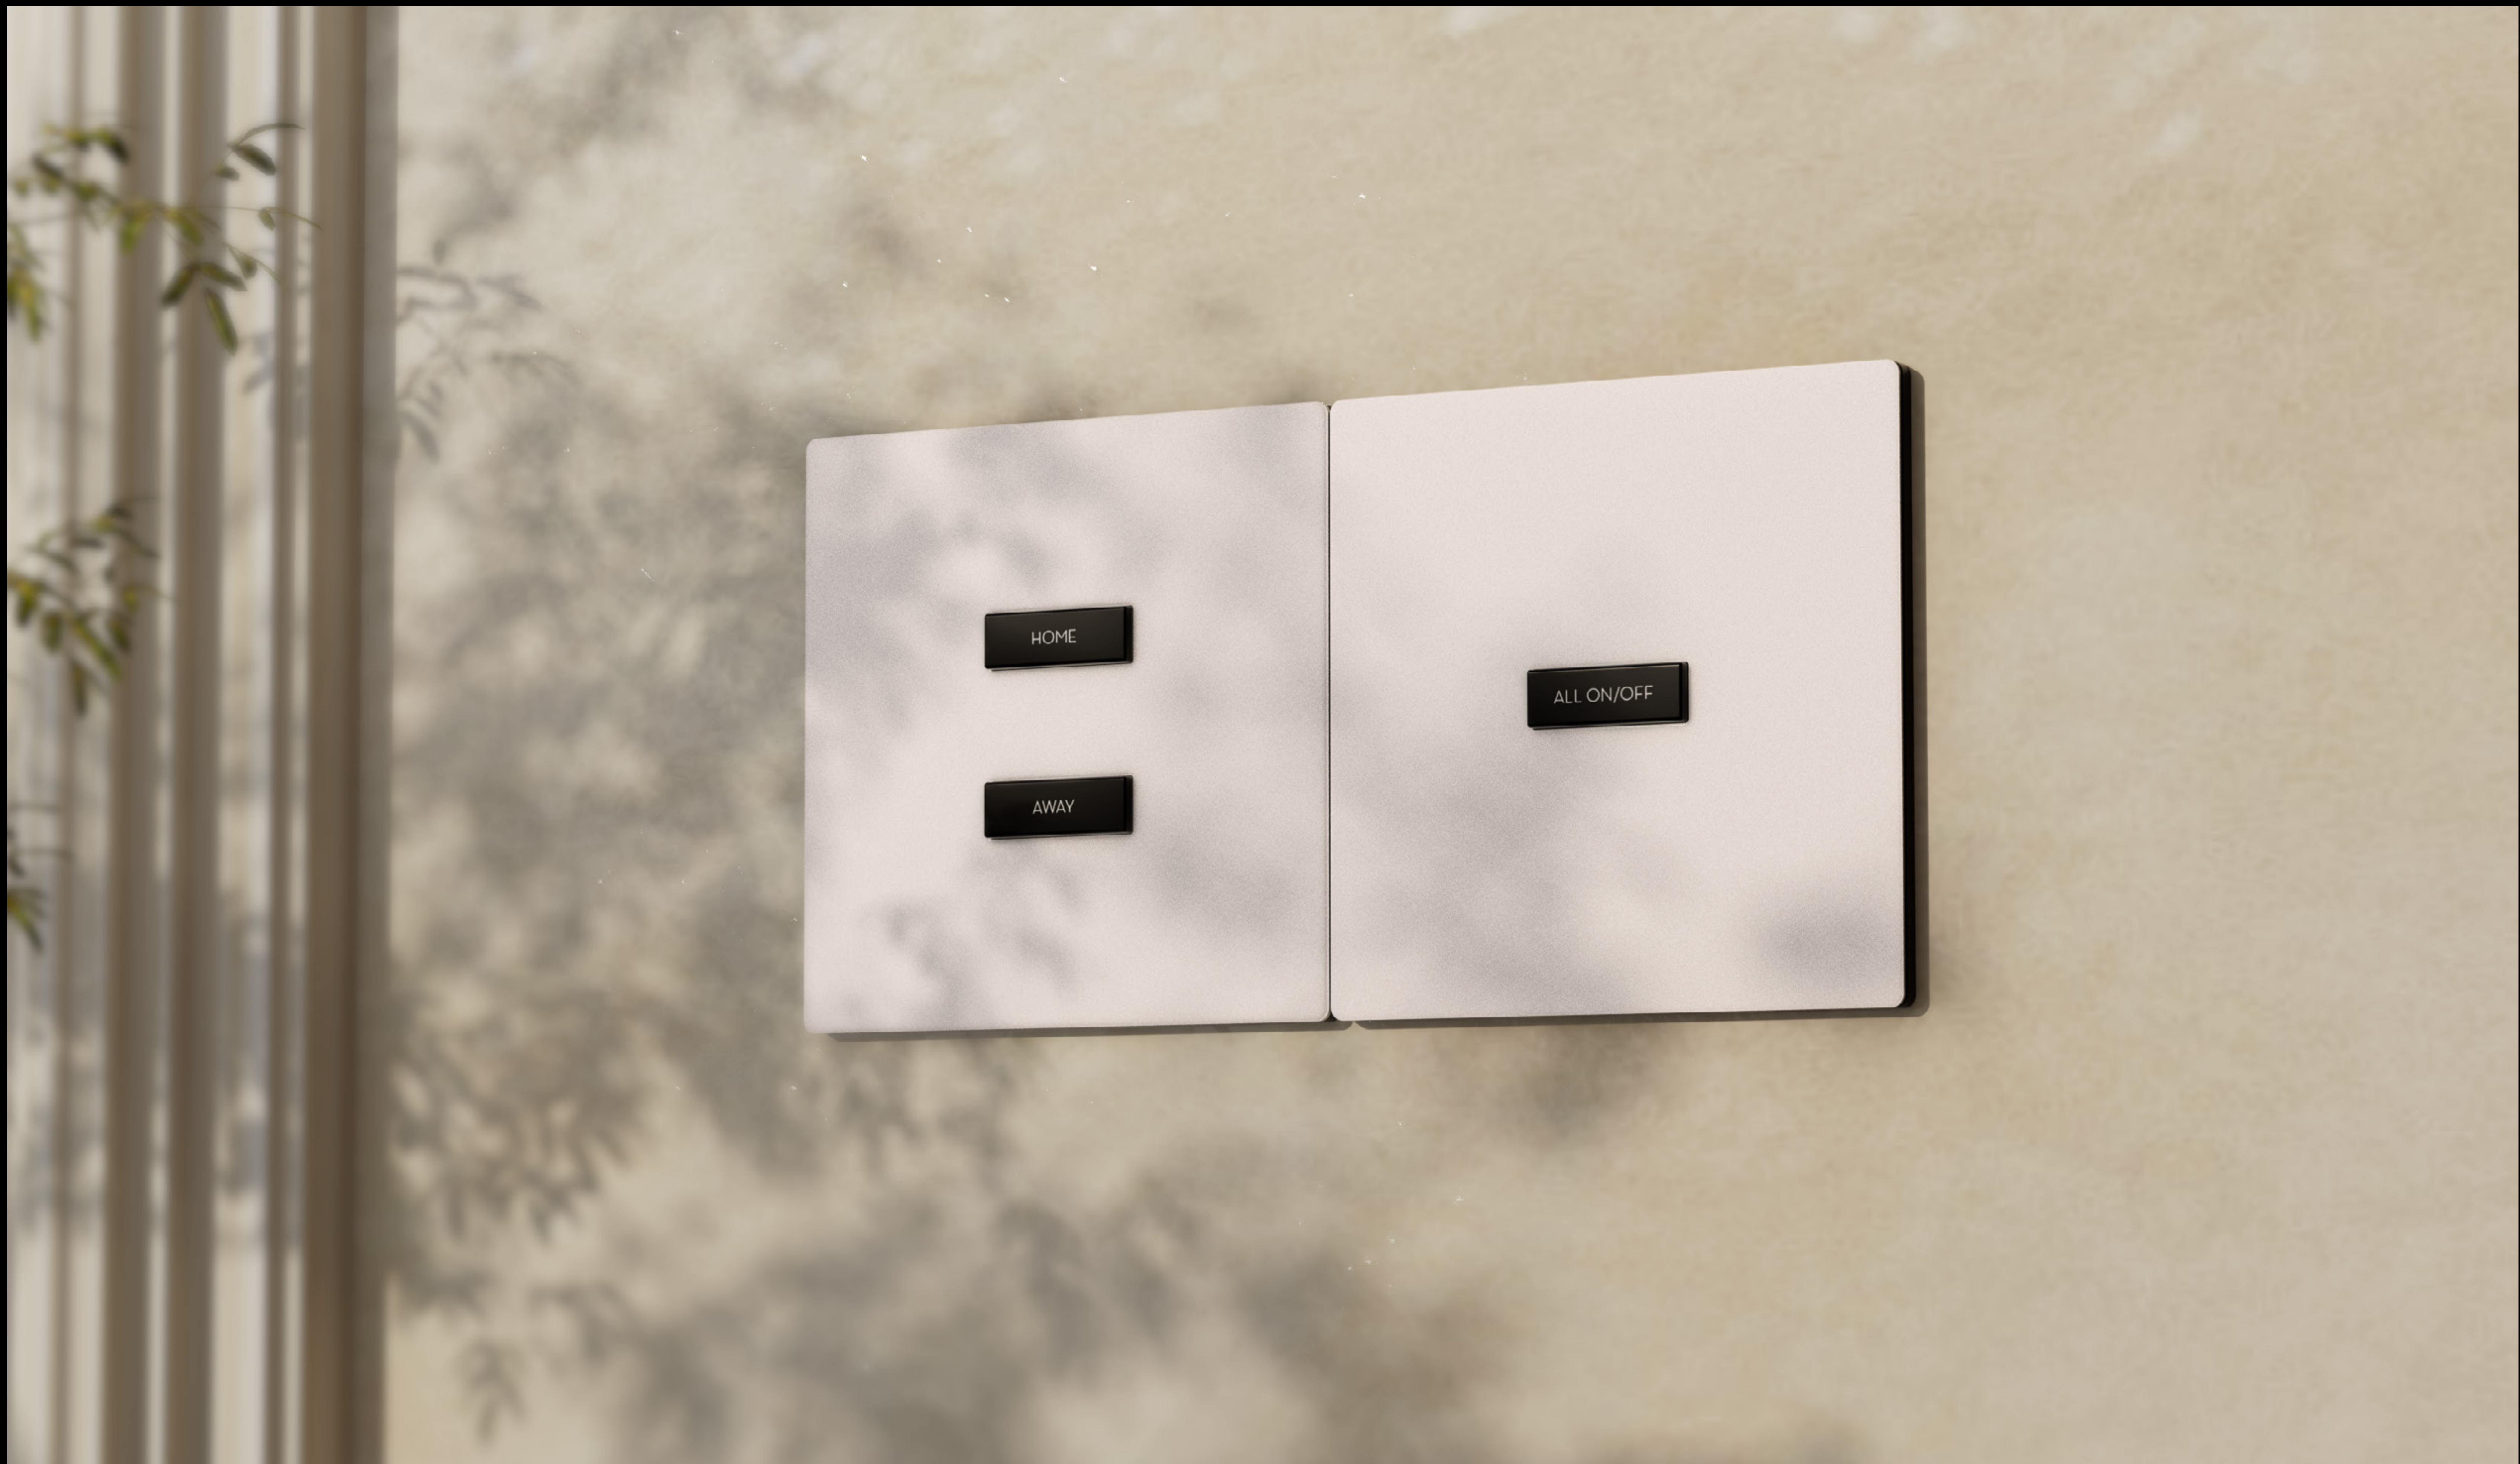

When SUBLIME meets the wall:
Every line casts a delicate shadow,
Every light reflects with precision,
Every detail brings quiet elegance to the space.

SUBLIME doesn't perform. It resonates.
SUBLIME doesn't ask for attention. It holds it.
In every edge, every finish, every silent response-
SUBLIME invites you to feel the presence of art.

The best technology disappears.
But true beauty endures.

SUBLIME, the premium panel series by LifeSmart, reimagines smart home design through exquisite customization and pioneering innovation. The patented Multi-layer Post-defined Modular Insertion Structure™ frees you to personalize materials, colors, and module layouts, merging elegance with function. Seamlessly compatible with both wired and wireless systems, SUBLIME offers flexible, reliable solutions tailored to your lifestyle. More than a smart panel, SUBLIME is a statement of taste, infusing warmth, beauty, and artistry into every moment of everyday life.

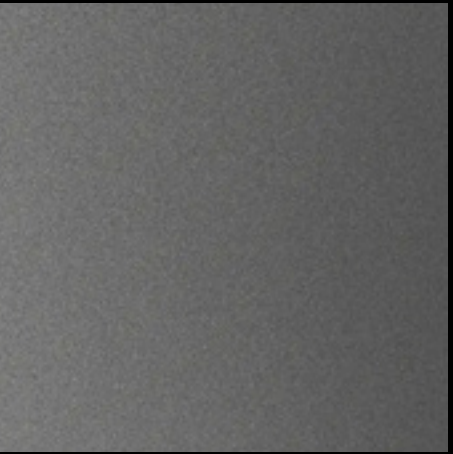

Air

This is LifeSmart's thinnest panel to date, with a faceplate thickness of just 3.7mm in the standard 86×86mm format, is available in one-, two-, or four-button configurations.

Silky Smooth

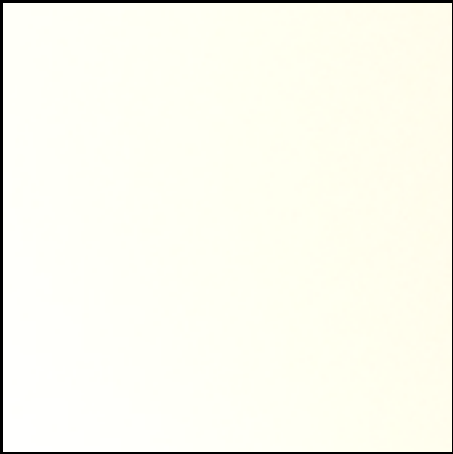

Crafted from high-haze AG tempered glass, the panel undergoes over ten meticulous processes - including CNC cutting, ultrasonic cleaning, tempering, and vacuum coating. The result is a silky-smooth surface with a jade-like warmth, enhanced by an anti-fingerprint and oleophobic layer for effortless maintenance.
